## **NAVIRISK MEMBER OF THE POLISH-UKRAINIAN CHAMBER OF COMMERCE**

**Strengthening the economic partnership between Poland and Ukraine and supporting cooperation between Polish and Ukrainian entrepreneurs is the aim of the Polish-Ukrainian Chamber of Commerce. NaviRisk has become a member of the Chamber and intends to actively participate in the initiatives implemented by this entity.**

Investors from Ukraine, who want to implement their investments in the Polish market, often come across barriers which they are unable to overcome on their own. Polish entrepreneurs encounter many problems in the territory of Ukraine. NaviRisk through its company - SecUA Risk Advisory - which operates on the Ukrainian market and supports Polish entrepreneurs in the area of business risk will take advantage of the potential resulting from joint activities within the framework of the Chamber.

- We are glad for the opportunity to cooperate with Ukrainian and Polish partners within the Chamber. As a global network of business risk, intelligence, cyber, and security consulting firms, we benefit from the potential of specialized local experts and companies operating in Ukraine in the area of security - emphasizes Bartosz Pastuszka, Managing Partner – CEO NaviRisk.

- This is our answer to the needs of international companies for local access to world-class services and advice, regardless of time zone and location, and the credibility and reliability of partners is crucial in carrying out these tasks - he stresses.
